No. P.—8 of 1926

Poona, 17th September 1926.

From

MAJOR-GENERAL A. HOOTON, C.I.E., K.H.P., I.M.S.,
Surgeon-General with the Government of Bombay,
Poona;

To

THE SECRETARY TO GOVERNMENT,
GENERAL DEPARTMENT, BOMBAY.

Subject.—Annual Report on Mental Hospitals.

Sir,

I have the honour to submit the Annual Report on Mental Hospitals in the Bombay Presidency for the year 1925.

2. *Buildings.*—All the Mental Hospitals were in a good state of repair. The block for 24 female patients and the hospital ward of 16 beds which were under construction last year at Naupada were completed and taken into use. Minor additions such as the provision of masonry tanks at the Mental Hospital, Ratnagiri, and Dhobie's quarters, Public Works Department store and central bath houses at the Central Mental Hospital, Yeravda, were also completed during the year.

3. *Water supply.*—The supply was good and sufficient at all the Mental Hospitals.

STATEMENT NO. I

Population

4. The total population of the Mental Hospitals during the year under report was 2,036 against 2,002 in 1924—an increase of 34. Admissions during 1925 including re-admissions were 443 males and 94 females against 440 males and 95 females respectively in the previous year. The daily average strength was 1,544·2 as compared with 1,489·6 in 1924.

Discharges—Cures

5. During the year under report 297 patients were discharged cured, 57 improved, 21 not improved and 16 were discharged otherwise.

Sickness and Mortality

6. The daily average number of sick treated in Hospital was 70·4 against 66·8 in 1924. The percentage of sickness to the daily average strength was 4·5 the same as in the previous year. On the whole the health of inmates during the year was good.

There was an epidemic of plague in Ratnagiri in the beginning

of the year under report but the infection was kept out by general sanitary measures and inoculation of the inmates of the Mental Hospital and its staff.

7. There were 107 deaths against 120 in 1924. The ratio of deaths per cent. of the daily average strength was 6·9, as compared with 8·1 in the preceding year. The following table gives the ratio per cent. of deaths to the daily average strength at the several Mental Hospitals :—

	Males	Females	Total
Naupada, Thana	13·2	10·6	12·6
Ratnagiri	7·9	23·4	11·8
Central Mental Hospital, Yeravda	E. 4·7 I. 4·4	1·5 2·4	3·3 3·8
Dharwar	13·3	2·2	9·7
Ahmedabad	4·0	6·6	4·6
Hyderabad	2·2	9·5	3·2
Total ...	7·0	6·6	6·9

8. The chief causes of death at the several Mental Hospitals during the year were Dysentery (16), Diarrhœa (16), Anæmia (11), Tubercle of the lung and other tubercular diseases (8), Diseases of the heart (8) and Pneumonia (5). The increase in the mortality at the Mental Hospital, Ratnagiri, was due to deaths among the old and infirm who had been in the Hospital for a long period, and among insanes admitted in a debilitated condition. The large number of deaths at the Mental Hospital, Naupada, was due, as in the previous year, to bowel and lung complaints.

STATEMENT No. II

Criminal Insanes

9. The total number of criminal insanes confined in the Mental Hospitals during 1925 was 256 (237 males and 19 females) with a daily average strength of 190·2.

STATEMENT No. III

Religion

10. Of the 537 insanes admitted during the year 34 were Europeans and Eurasians, 31 Indian Christians, 331 Hindus, 122 Mahomedans and 19 other castes.

STATEMENT No. IV

Previous occupation of the insanes admitted

11. Domestic servants (69) furnished the largest number of admissions followed by labourers (49), Cultivators (40), clerks (34), Merchants and traders (34), mendicants (24) and 138 other known occupations. In 144 cases the previous occupation could not be ascertained and 5 had no occupation.

STATEMENT No. V

Ages of insanes admitted

12. Thirty-five insanes were under 20 years of age on admission, 399 between 20 and 40 years, 99 between 40 and 60 years and 4 were upwards of sixty years.

STATEMENT No. VI

Types of insanity

13. The principal types of insanity treated were mania 698 against 738 in 1924, melancholia 419 against 361, dementia 232 against 245, delusional insanity 79 against 98, insanity caused by *Cannabis Indica* or its preparations 104 against 108 and idiocy 45 against 51.

STATEMENT No. VII

Artiological factors and associated conditions in the insanes admitted

14. The principal predisposing end exciting causes were mental stress 105 against 59 in the previous year, the abuse of intoxicants 68 or the same as in 1924, mental instability 74 against 57 and toxic diseases 33 against 35. Owing to insufficient history the causes of insanity were not ascertained in 252 cases as compared with 152 in 1924.

STATEMENT No. VIII

Cash accounts

15. The receipts from paying patients amounted to Rs. 92,429 in 1925 against Rs. 85,417 in 1924. The value of stores received from the manufacturing department less cost of raw materials was Rs. 18,025. The total receipts under the two heads were Rs. 1,10,454 as compared with Rs. 98,795 in 1924.

16. The total expenditure in the year amounted to Rs. 7,63,286 against Rs. 8,19,978 in 1924. Deducting the receipts, the net expenditure was Rs. 5,21,572 against Rs. 6,06,628 in 1924. This reduction was due to the decreased expenditure at the Yeravda Mental Hospital chiefly on account of the decrease in the schedule rates of supplies, Superintendent's pay, Public Works Department charges, etc. The following table gives the cost per head per annum in the several institutions during 1924-1925 :—

Institution	1924	1925
Naupada, Thana	407	414
Ratnagiri	250	246
Central Mental Hospital, Yeravda	817	632
Dharwar	288	278
Ahmedabad	234	237
Hyderabad	257	256

Employments and amusements

17. Gardening, weaving and cane work formed the chief occupations for insanes, apart from helping in the domestic work of the institutions.

18. The Empire Cinema Co., Poona, continued to give a weekly cinema entertainment to the patients at the Central Mental Hospital, Yeravda. Two pianos were given as a gift by a Parsi gentleman and a donation of Rs. 500 was made by the W. I. T. Club to the same hospital. The Indian Red Cross Society presented a gramophone with 3 dozen plates to the Mental Hospital, Ratnagiri. The amusements grants were spent as usual on the distribution of sweets, jaggery, tobacco, bidis, tea, etc., to the patients. The total amount so spent was Rs. 2,724.

Visitors

19. The official visitors were regular in their attendance at all the hospitals.

20. A summarised report of the Central Mental Hospital, Yeravda, is published as an appendix.

I have the honour to be,
Sir,
Your most obedient servant,

A. HOOTON,
Major-General, I.M.S.,
Surgeon-General with the Government of Bombay.

APPENDIX

Annual Report of the Central Hospital for Mental Diseases, Yeravda, for the year 1925

Lieutenent-Colonel W. S. J. Shaw, M.D., I.M.S., was in charge of this Hospital up to 28th August 1925, and I have been in charge for the rest of the year.

Statement I.—On the 1st January 1925 the Hospital had a population of 555 (379 males and 176 females). The admissions and re-admissions during the year were 128 males and 38 females giving a total of 166, as compared with 169 (133 males and 36 females) during the year 1924.

The total number treated in 1925 was 721 as compared with 703 in 1924.

During the year 78 patients were discharged recovered, 17 improved, 14 not improved and 1 escaped, making a total of 110. There were 22 deaths, leaving a total of 589 on 31st December. A detailed statement of deaths is shown below :—

V. D. H.	... 3	Dysentery ...	2
Pneumonia	... 1	Cirahosis of liver ...	1
General Septicæmia	... 1	Anergic stupor ...	3
Cerebral Atrophy	... 4	Malaria ...	1
Epilepsy	... 2	Acute enteritis ...	2
Acute Delirious Mania	... 1		
Acute Rheumatic fever	... 1	Total ...	22

The general health of the inmates continued good throughout the year.

The daily average strength in 1925 was 588·53 (401·25 males and 187·28 females) against 543·9 (375·6 males and 168·3 females) in 1924.

The total accommodation on 31st December was 565 (378 males and 187 females) including that of the Infirmary. No additional accommodation has been provided during the year.

Statement No. I-A.—Shows the number of cases sent for observation during the year—of this number (29) 27 were certified and admitted to the Hospital, 1 was discharged as not insane, and 1 remained uncertified at the end of the year.

Statement No. II.—Criminal Lunatics. The total number of criminal lunatics was 37 during the year under report, as shown in the statement, out of which 5 were discharged, leaving a total of 32 on 31st December 1925. Full statistics are given in the statement.

Occupation of patients.—This is gardening, working on the large farm, assisting in office, in the library, stores, kitchen, carpenter's shop, and cleaning wards, etc. Weaving and caning of chairs has afforded occupation to certain inmates; while female patients are occupied at needlework, knitting, grinding corn, etc. Patients are employed on the work considered best suited to them, but a number especially Parsis and Europeans, can be induced to do little. Here again is seen the necessity for an ample and cheap

water supply; there are over 120 acres of farm lands which could be more efficiently cultivated if we had water for irrigation purposes, this would of course employ more patients.

Hospital outturn.—The value of garden produce supplied to the Hospital as well as the public in 1925 was Rs. 10,049-13-9 as compared with Rs. 9,541-9-5 in 1924. The estimated value of the jaggery made from our sugarcane crop is Rs. 2,250 against Rs. 2,186 during the previous year. It is all consumed by the patients as an article of diet.

Recreation and amusement.—The amount spent from the special allotment this year was Rs. 1,187-15-0 as compared with Rs. 2,032-7-4 in 1924. The usual weekly recreation hall entertainments have been held throughout the year, consisting of games, music and other shows, *e.g.*, juggling, dances while many patients are taken for walks and picnics in the country. But there is a great need of a motor car to take patients in parties of 8 or 10 for drives. Years ago, no doubt, patients were content to go for walks, but in these enlightened days they ask for motor drives and are not satisfied with mere walks. It is all a part of the modern tendency and is seen in the insane as well as the sane. Owing to the great kindness of the Proprietor of the Empire Cinema, Poona, a weekly cinema entertainment is given here to the patients, and when our own projector became defective in November he was good enough to place his own machine at our disposal so that the patients should not be deprived of the weekly show. Government have recently sanctioned a sum of Rs. 850 to purchase a new projector which is expected very shortly. At Christmas and at the various annual festivals, such as *Divali*, special entertainments has been given to the patients. In addition to the two instruments, two more pianos have been very kindly given as a gift to the Hospital by a Parsee gentleman who wishes to remain anonymous. I can only express to him our very great appreciation of his generosity. We have also received donations of Rs. 500 from the Western India Turf Club, Rs. 122 from Mr. A. C. Patel and Rs. 150 through Mr. S. M. Chothia, for the provision of musical instruments for the patients, as well as many other smaller, but none the less welcome donations. On the male side billiards, cricket and tennis also afford amusement and relaxation to those patients who can take part in them.
